

**How?**

- We use the selfie code to explain everything. Students will need to read, understand, and modify the code to follow the course.
- Instead of copying code here we provide clickable links to actual selfie code snippets on [github.com](#)
- Standard terminology is introduced with clickable links to [wikipedia.org](#)

# Course Material

- Website: [selfie.cs.uni-salzburg.at](http://selfie.cs.uni-salzburg.at)
- Slides (draft): [selfie.cs.uni-salzburg.at/slides](http://selfie.cs.uni-salzburg.at/slides)
- Book (draft, outdated): [leanpub.com/selfie](http://leanpub.com/selfie)
- Sources (code, slides, book): [github.com/cksystemsteaching/selfie](https://github.com/cksystemsteaching/selfie)
- Install selfie on your machine or in the cloud using the instructions provided in the selfie repository on [github.com](https://github.com)
- Please note that the slides are incomplete as of 2018 and published incrementally as they become available.
