## **Properties**

The scanner can not recognize structure:
 It just operates on a sequence of characters and turns it into a sequence of symbols.

To recognize structure, the scanner would need to be able

to **count and remember** (e.g. the number of braces).

Therefore we need something more powerful called a

## Properties

• The scanner can not recognize structure:

It just operates on a sequence of characters and turns it into a sequence of symbols.

To recognize structure, the scanner would need to be able to **count and remember** (e.g. the number of braces).

Therefore we need something more powerful called a parser.
